Make Binoculars Our Trip!

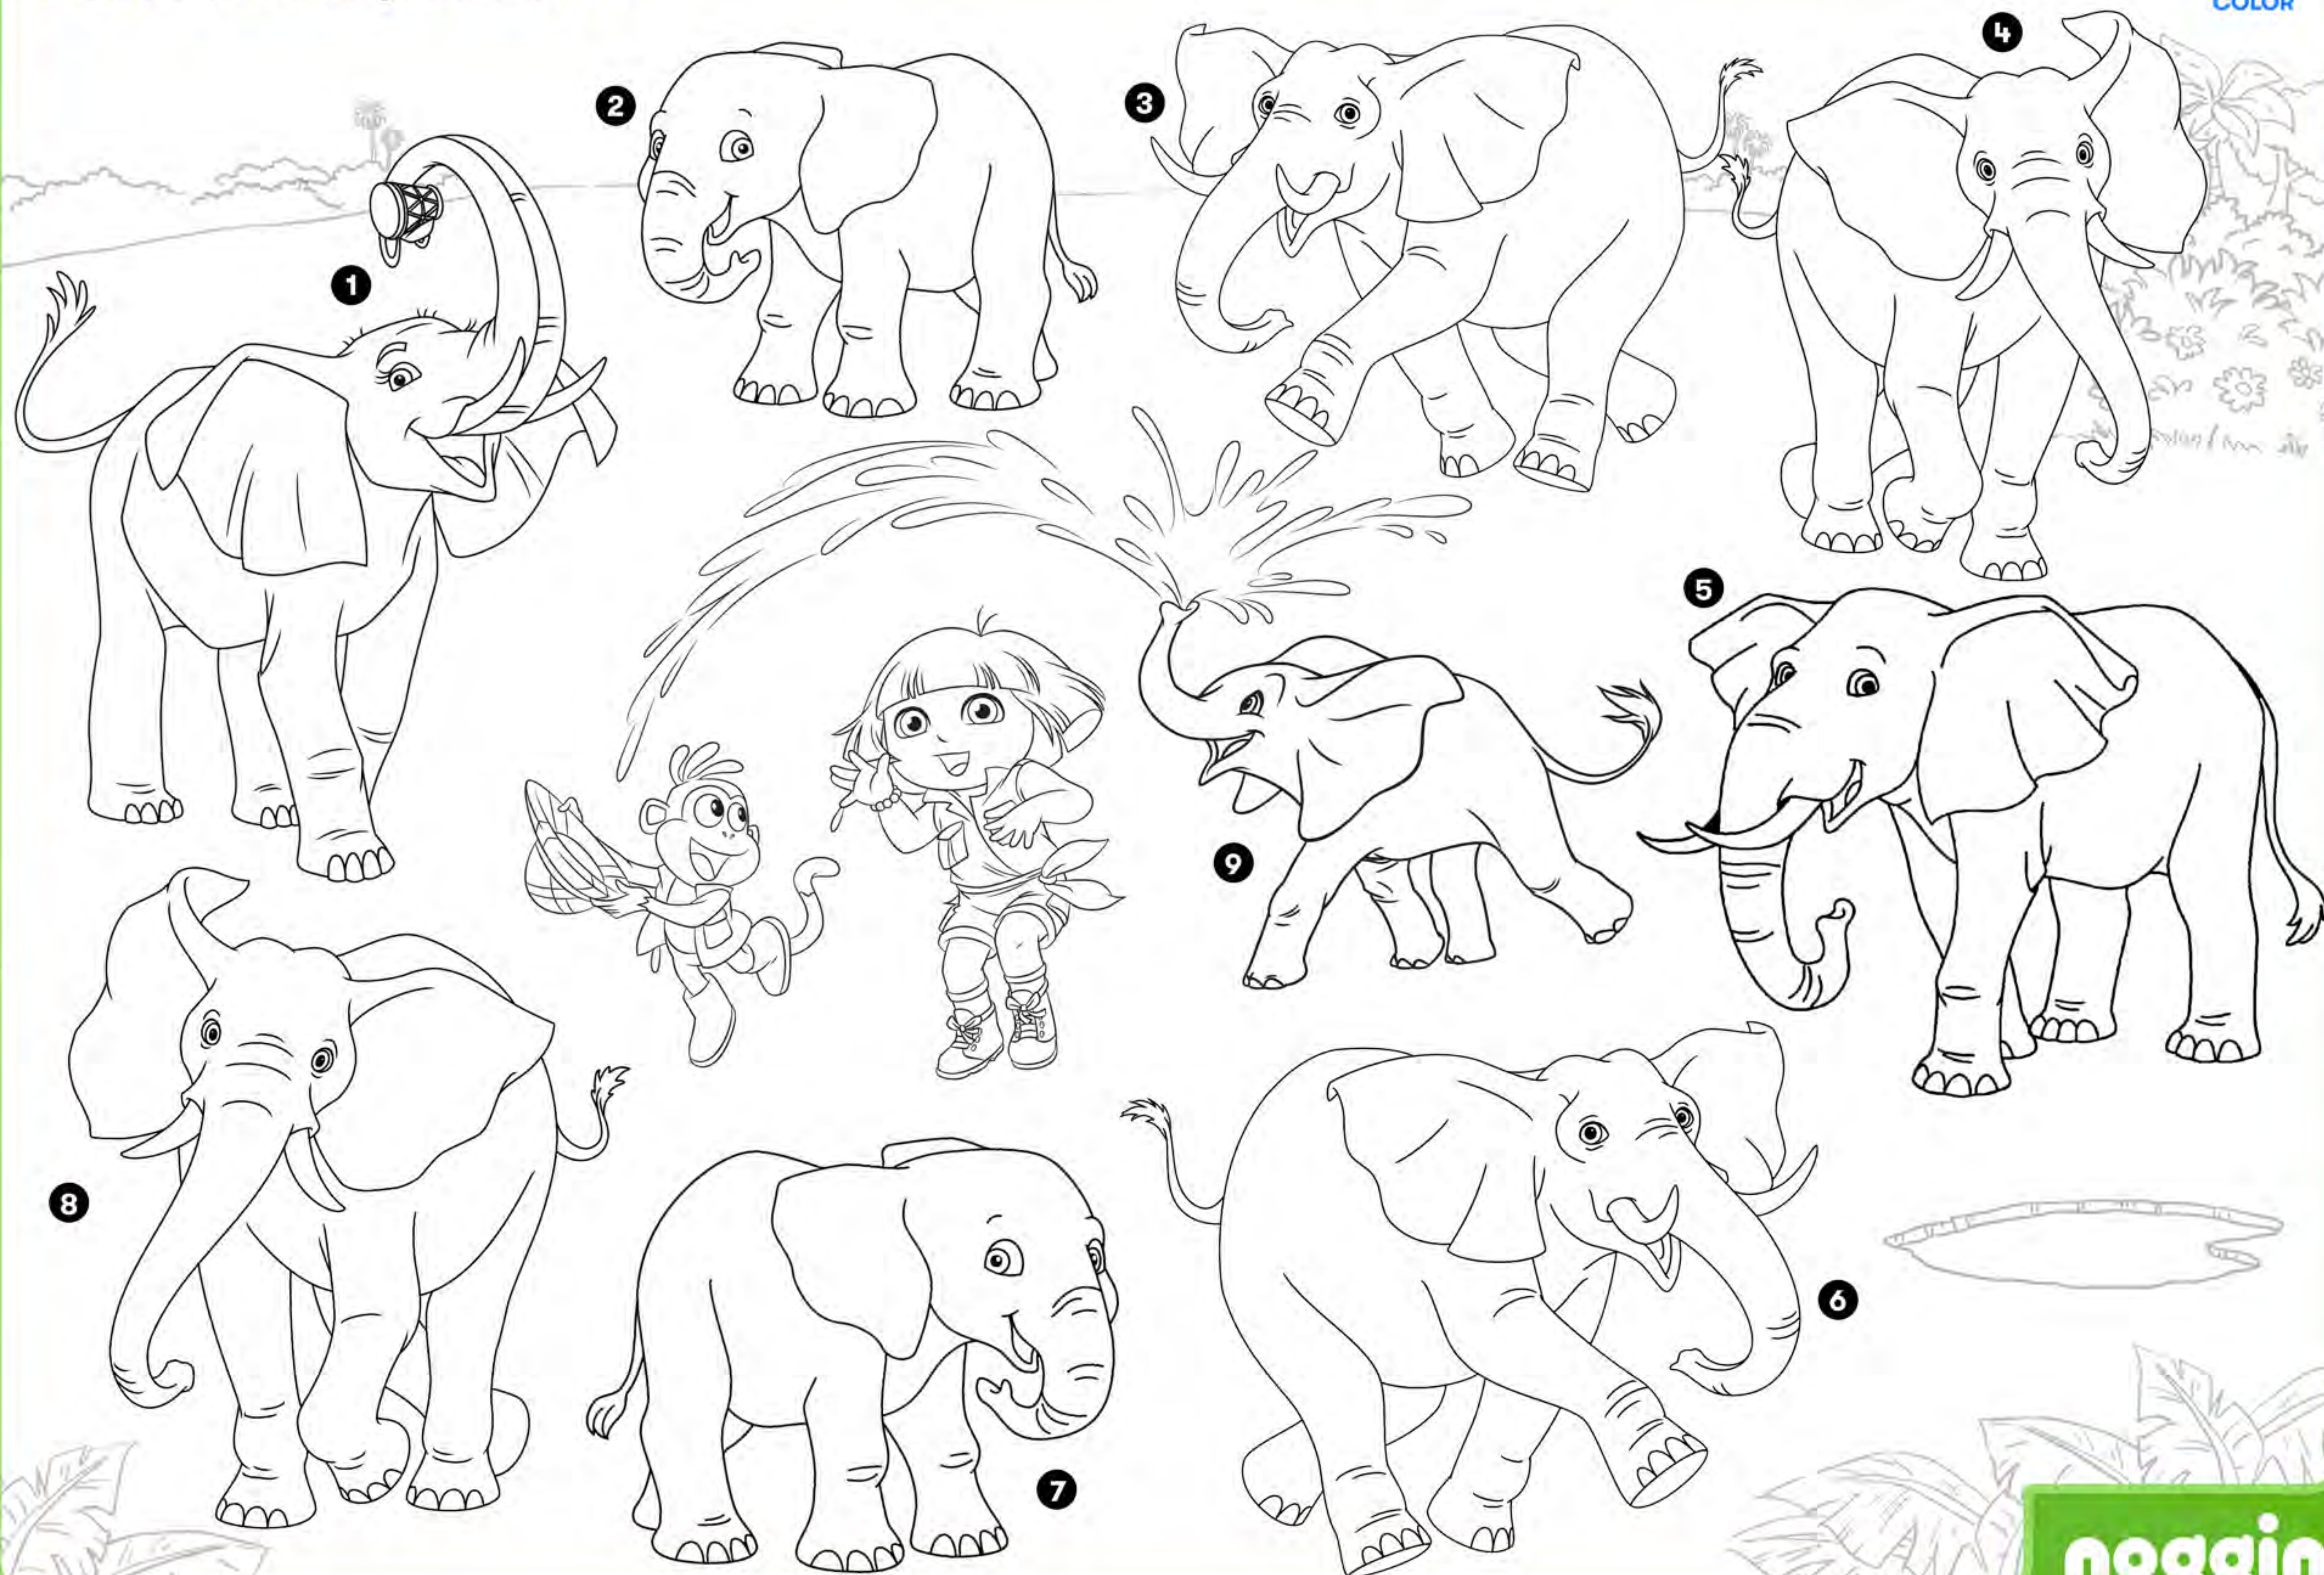

Color, cut and roll into a cylinder. Then glue each cylinder together. Wrap strip around the front of the binoculars to hold together

Watch the koalas and draw where they live. Did you know that koalas can curl their hands and feet around tree branches so they can grip and climb? And they have big, fluffy ears and can hear everything!

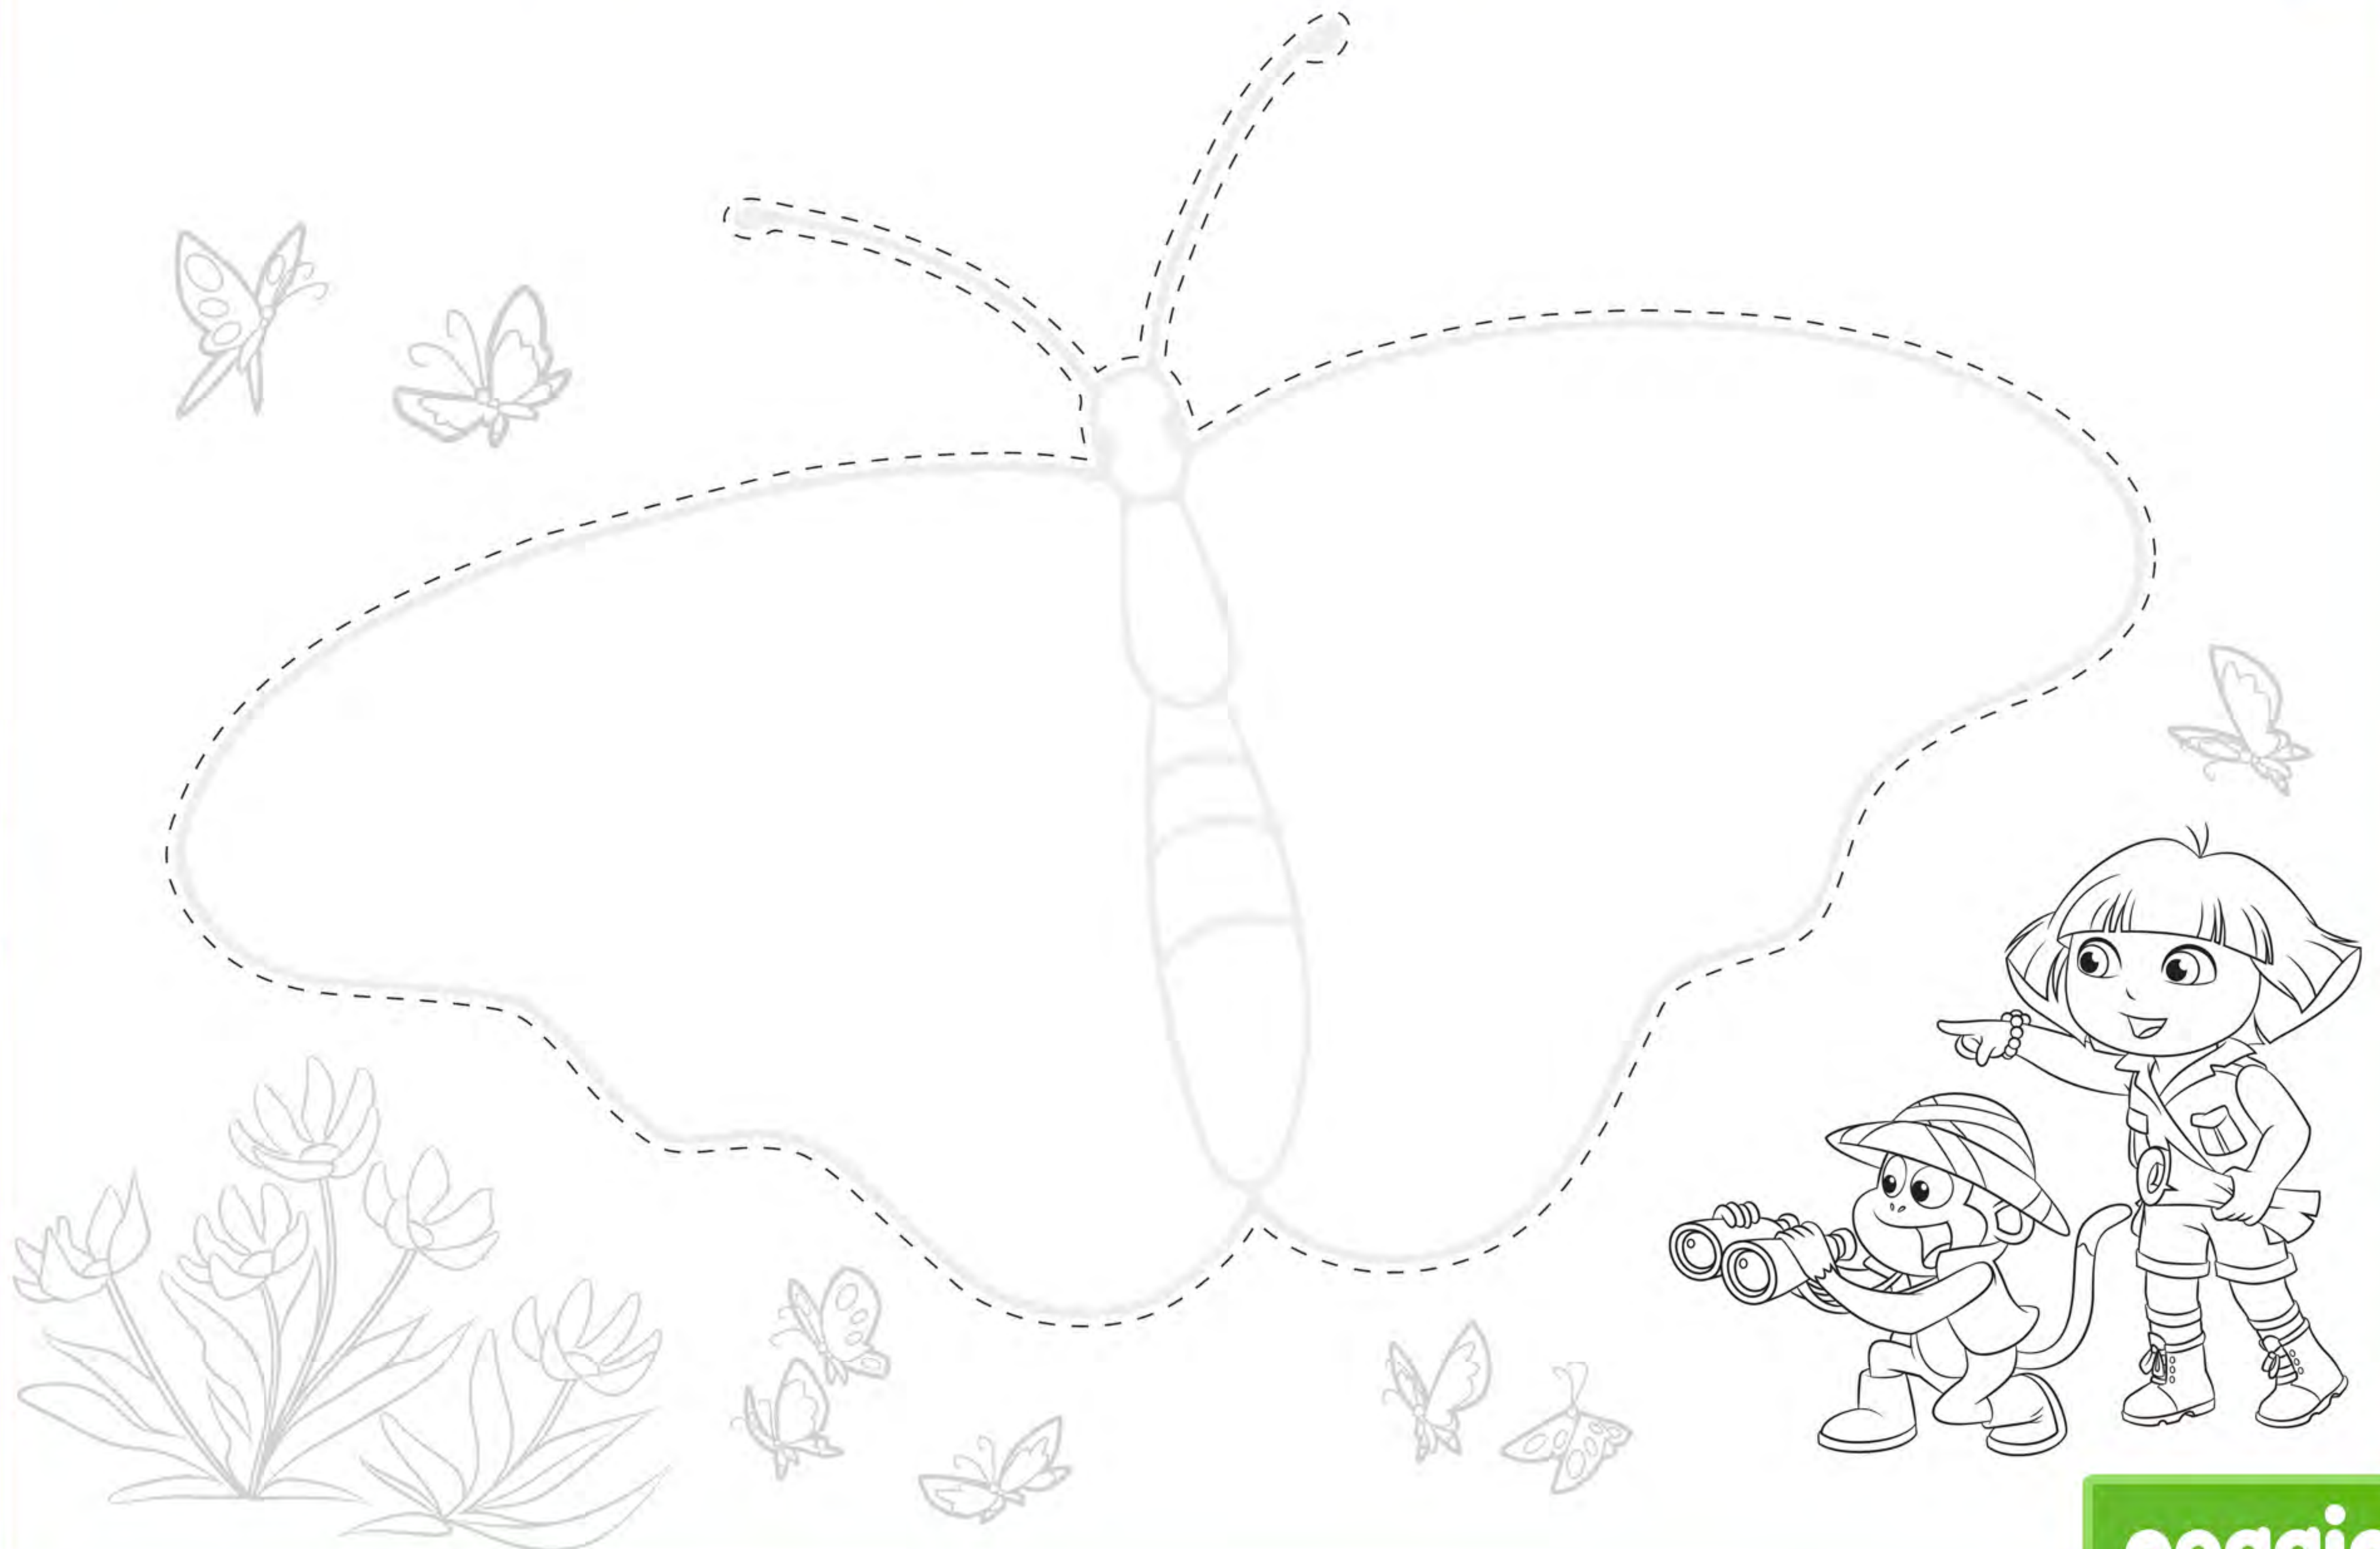

How many elephants do you see? There are currently 9 at this zoo. Each time you see one, **COLOR** in an elephant here.

Let's visit the tigers. Are they hiding? Did you know that no two tigers have the same stripes?
Draw some stripes on this one!

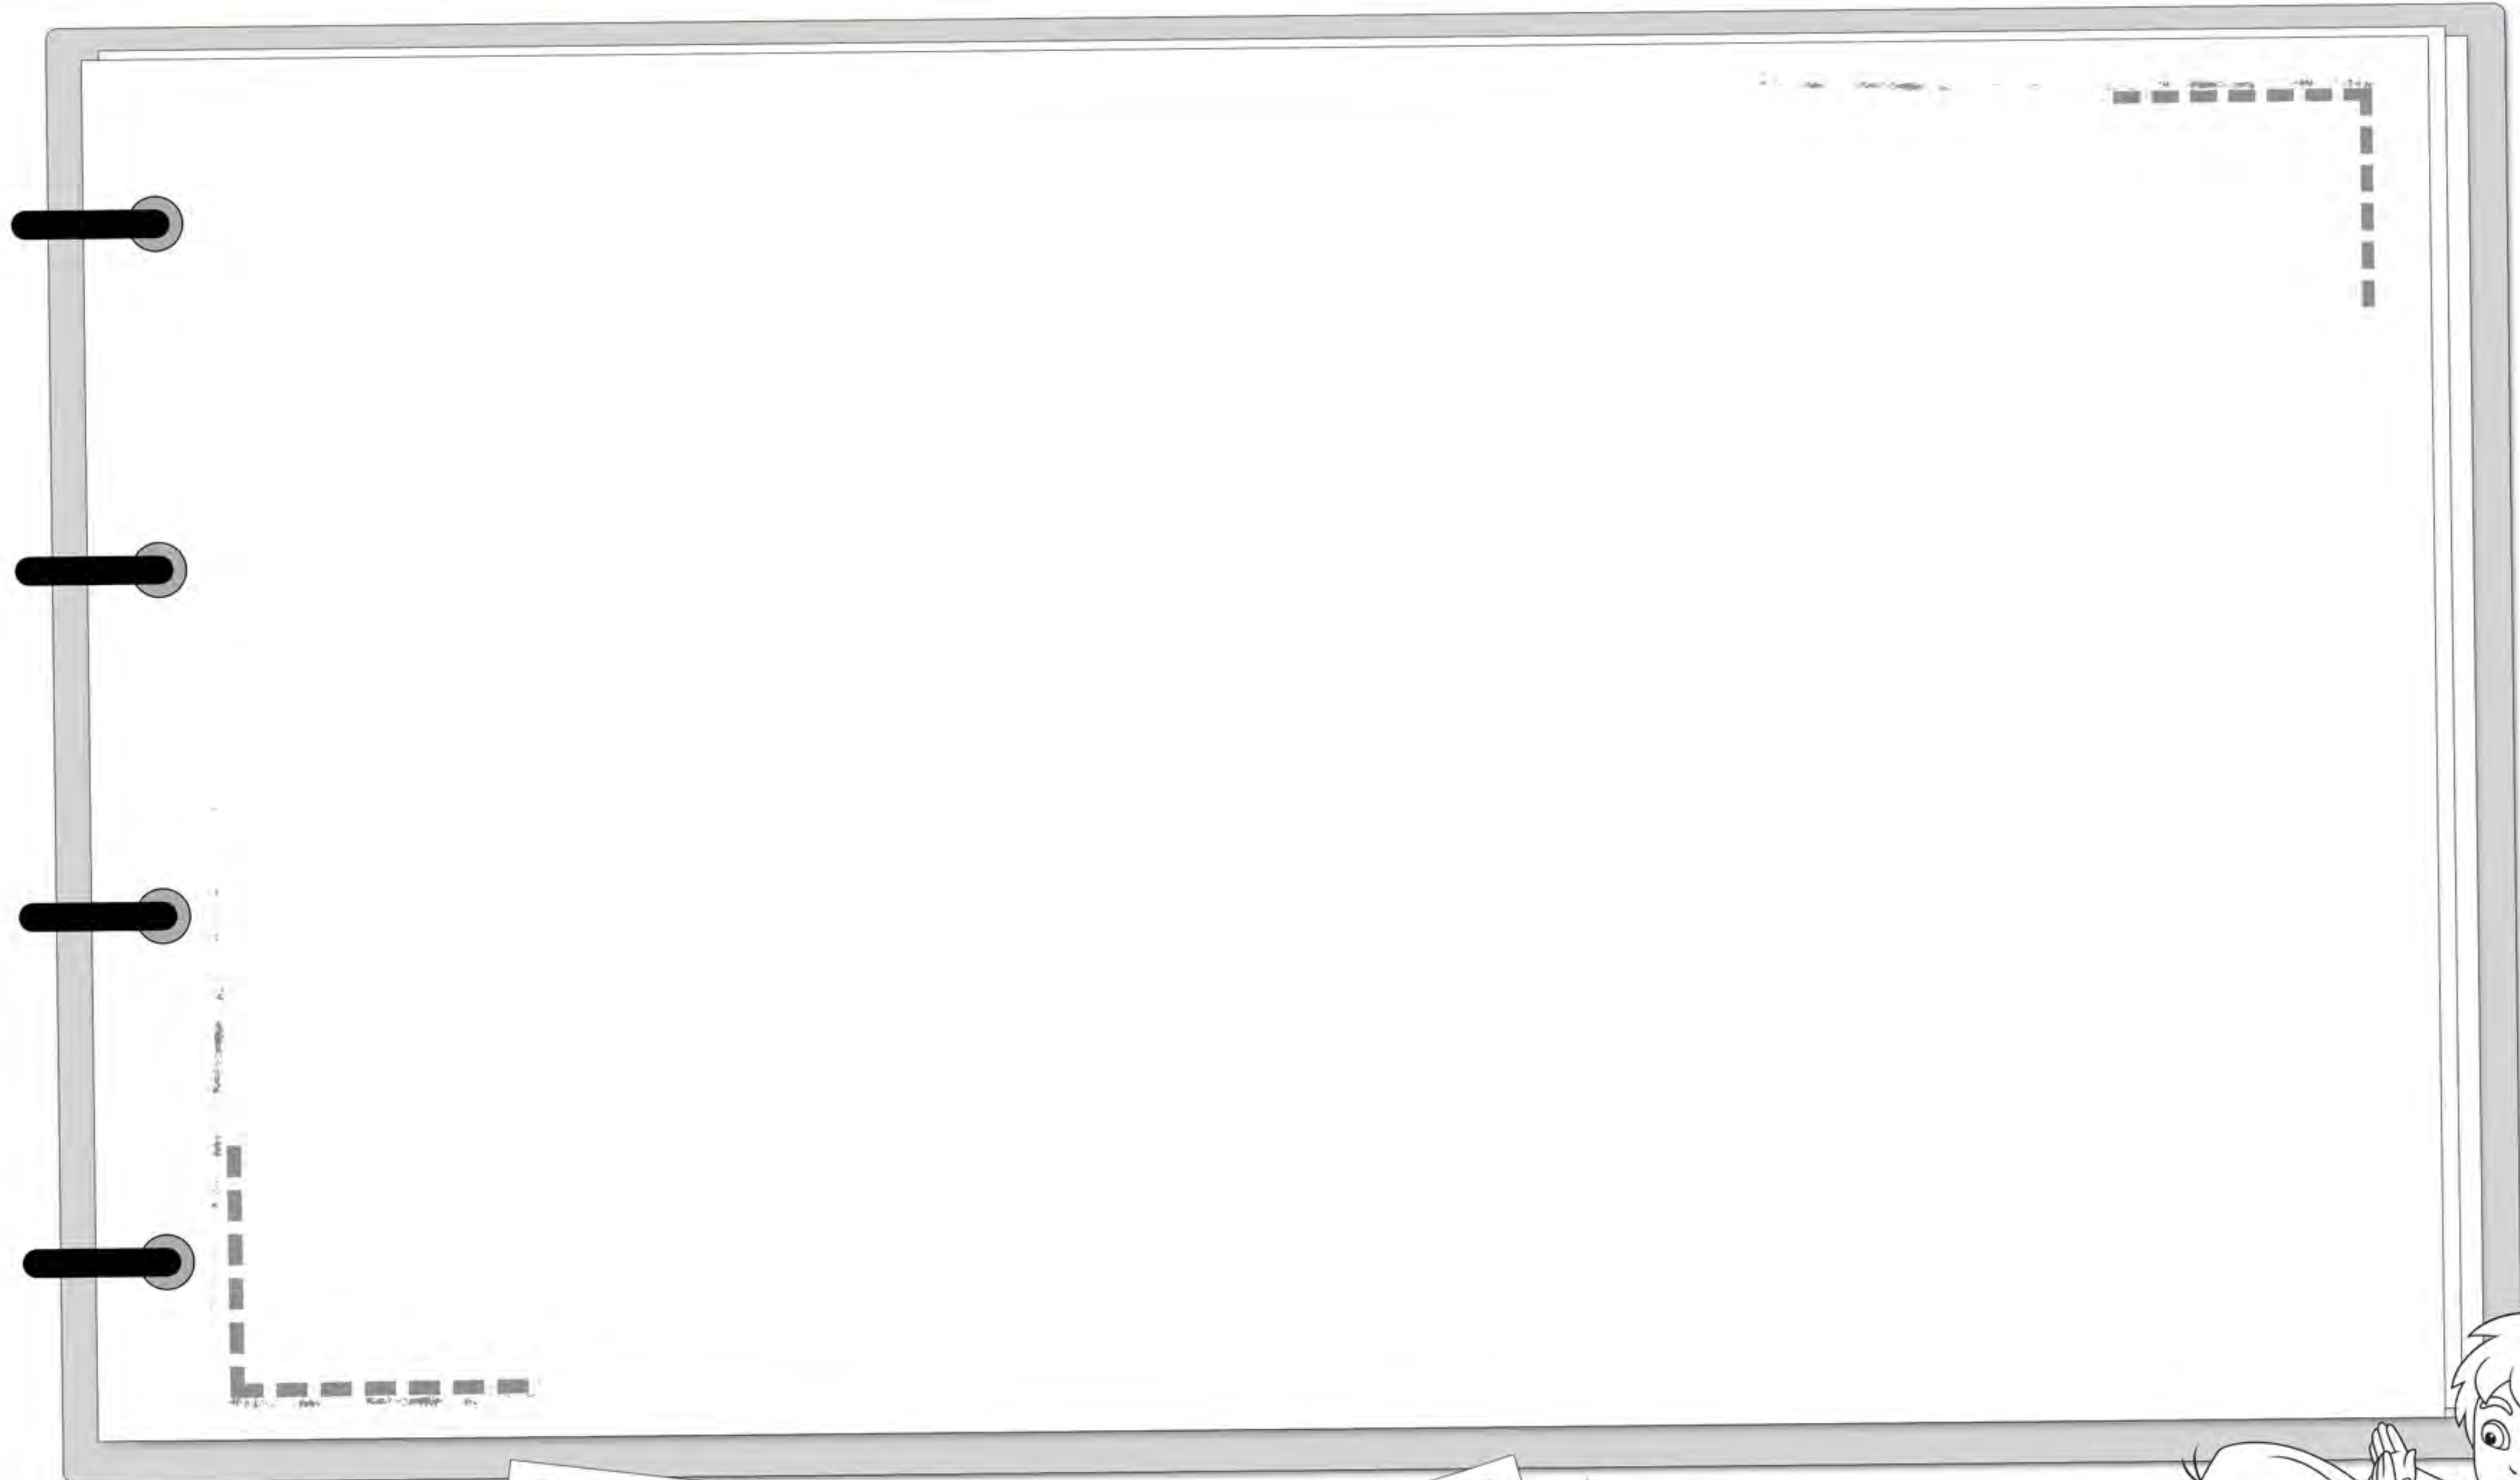

There are beautiful butterflies here. Butterflies have patterns on their wings that look the same - they flap them 5 times every second! Draw the wings of a butterfly!

What was your favorite part of our field trip to the zoo? Draw it!
